

Case Study - Transport

Bangalore International Airport - India

Project Specifications

Product Specified: NRES

Colour Specified: .47 Yellow

Sector: Transport

Project Description

Our RezTred® resin system has been used as an airport warning system at the Bangalore International Airport in India.

Using yellow resin, our operative installed a warning line that includes text in both English and Hindi.

Using RezTred® in such a busy environment showcases how resilient and hardwearing the product is.
