

Case Study - Retail

Marks & Spencer - Paris

Project Specifications

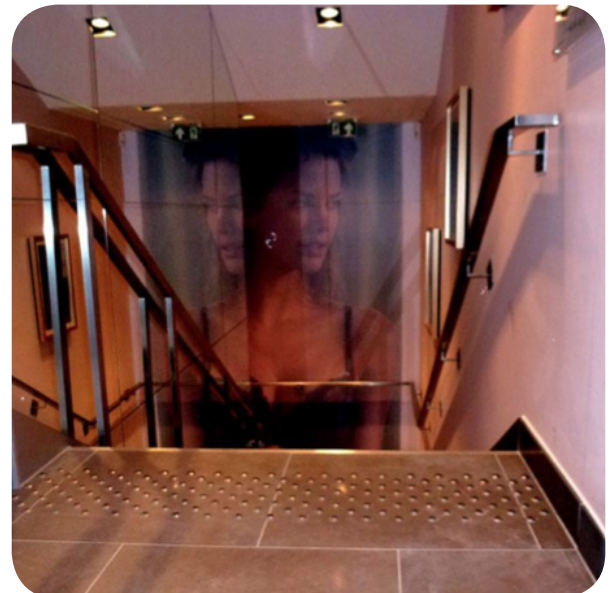

Product Specified: FTSAS - 25mm Stainless Steel 3M adhered tactile

Colour Specified: Black Anti-Slip Resin Insert

Sector: Retail

Project Description

Our patented system was chosen for the new M&S flagship store in Paris, France. Using a bespoke coloured anti-slip insert chosen by the client's architect, our team travelled to Paris overnight, installed the tactiles to staircases throughout the store and left that same day. Tactiles were in use by the general public within 24 hours of installation.
