

Case Study - Tourism

Tower of London

Project Specifications

Product Specified: NRES225D

Colour Specified: Bespoke colour matched RAL (Blood Red)

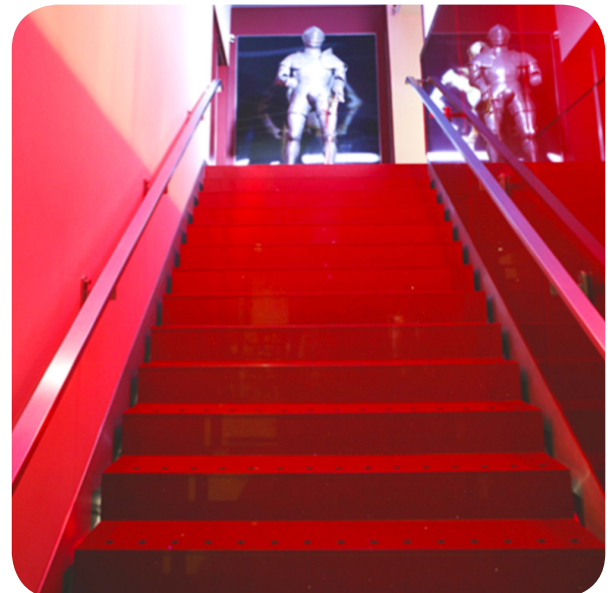

Sector: Tourism

Project Description

The architect had a colour scheme that he was wishing to match (Blood Red) so we created a bespoke resin to colour match the RAL reference that was needed for this project.

In an area that receives a very high volume of traffic, the architect needed something that would provide a high level of anti-slip and not look out of place at the same time.

NRES225D was the perfect weapon of choice. Elegantly and discreetly providing an R12 level of anti-slip protection.
