

# Diamond Polishing Pads

50 and 100 grit polishing pads are for initial work when a larger grain size is necessary and maximum working speed should not exceed 4500 rpm.

The 200 and 800 grit polishing pads are for medium buffing and their maximum speed is 4500 rpm.

The 1,500 grit polishing pads are the finest and recommended for final polishing work. Their maximum operating speed should not exceed 4500 rpm.

- Sharp, durable, and provides the perfect finish
- Great for polishing flat surfaces and beveled edges
- Lightweight design
- Perfect for white and light colour ceramic tiles

## Grit Chart

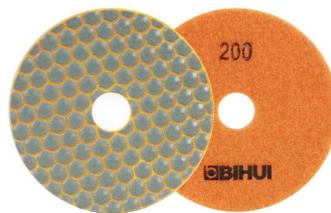

BU-DPP405 - 100mm (4")	Rough and sharp grit
