

Metal Shelves

KBSTS - Straight Tile-In Shelf

Straight lines and elegant designs; The shower shelf range is expanding due to popularity and the Straight Stainless Steel Tile-In shelf is now available in 8 different lavish finishes shared with new designs giving flexibility in positioning and aesthetic for your shower installation.

KBREV - Reversible Shelf

- Premium model
- Grade 304 brushed finish
- 1.5mm thickness
- Unique reversible option
- Allows tile finish
- Integral bead to suit 10/12mm tile edge
- Tile-in

KBSWS - Wing Shelf

- Tapered corner installation
- Grade 304 finish
- 1.5mm thickness
- Retrofit installation

KBSDS - Diamond Shelf

- Symmetrical corner installation
- Grade 304 finish
- 1.5mm thickness
- Retrofit installation

KBSSS - Retro-Fit Corner Shelf

Stylish shower shelf in brushed stainless steel. Fits in 90° corner. The shelf attaches in the grout joint with silicone - no drilling required! Can be tiled in during installation or fitted retrospectively.

- 1.5mm thickness
- No exposed sharp edge
- Stainless steel
- Holes for drainage

KBSSA - Retro-Fit Corner Shelf

Stylish shower shelf in aluminium. Fits in 90° corner. The shelf attaches in the grout joint with silicone - no drilling required! Can be tiled in during installation or fitted retrospectively.

- 1.5mm thickness
- No exposed sharp edge
- Aluminium
- Holes for drainage

Technical Details

Profiles are available in different anodised finishes and powder coated finishes - All natural Aluminium (Mill Finish) has a oxide film of approx. 0.2 microns, when Mechanically and Chemically polished the anodising process increases this to 5 microns, up-to 20 for the Matt finish and 100 for powder coated.

Aluminium AA 6063 T6 / UNS A96063 anodised to DIN 17611

Stainless Steel is a corrosion resistant chromium/ nickel alloy steel that is strong and durable with excellent lustre. However, it is not rustproof, particularly in the harsh environment of a swimming pool. Chlorine and bromine used for sanitization are highly caustic chemicals for stainless steel and heat and humidity enhance the corrosiveness of these chemicals. Regular cleaning and wiping dry after use is the best way to prevent corrosion and add to the service life for your profiles and any other stainless steel equipment. The goal of your cleaning and maintenance program should be to keep the stainless steels protective Chromium oxide layer intact. This is what prevents corrosion. Varying Stages of contamination.
